EXECUTIVE SUMMARY

- a. This document presents an addendum to the Dieng 2021 Land Acquisition and Resettlement Plan (LARP) document prepared by PT. Geo Dipa Energi (GDE) which was approved by the Asian Development Bank (ADB) in December 2021.
- b. Project Description. The construction of the Dieng Unit 2 PLTP Project, financed by the ADB in Indonesia, will include drilling activities for steam production wells, construction of steam pipelines and construction of a power plant. Based on the Dieng 2 PLTP project planning documents (Feasibility Study and Resettlement Plan) it has been identified that a land area of around 309,000 m² (30.9 ha) is required. Of this area, around 305,000 m² are already available and owned by PT Geo Dipa Energi (GDE).
- c. Some of the well pads require additional land, in particular for drilling activities in the area of well pad 7, well pad 9 and well pad 30. Referring to the results of a study by the PMU Drilling Team the total land requirement for well pad expansion areas is 12,459 m² located in Karangtengah Village, Banjarnegara Regency.
- d. Prior to the payment for lands, GDE sought a legal opinion from the government auditors (Badan Pengawasan Keuangan dan Pembangunan/BPKP); one of the auditor's recommendation was for GDE to use the area of land written in the land certificates as the basis for compensation rather than the measurement by the land office. GDE asked the appraisers to conduct a re-evaluation of compensation, referring to the area listed in the affected households (AHs) certificates, as also recommended by the auditor. The revaluation was held on 16 December 2021. Next, the notary requested verification of the affected area listed in the certificates in order to prepare a deed of sale and purchase land. GDE, supported by the District Land Office, re-measured the land and found a difference of figures for the affected area for pads 7 and 9. The 3rd revaluation of compensation was then held on 13 September 2021, referring to the latest measured areas of land affected. Considering this, changes to the approved LARP 2021 were considered necessary, effectively creating an amended LARP (2022).
- e. **Scope of the 2022 Addendum to the 2021 Dieng LARP.** The scope of the addendum document consists of: i) amendment of the description of the additional land requirement for drilling activities; ii) the scope of impact; iii) loss of land; iv) loss of plants/crops; and v) land acquisition budget and financing; (vi) consultation and Participation with Affected People; (viii) the grievance redress mechanism; and (ix) Monitoring and reporting.
- f. **Resettlement Budget and Financing Plan.** The total top up compensation for additional land in well pad 7 is **IDR 926,139,750** and well pad 9 is **IDR 398,583,000**. The total land acquisition budget is **IDR 30,826,838,499.63 or US\$ 1,976,712.95** (1US Dollar = 15.595/19 December 2022) was estimated for procurement of land through negotiated settlement on the basis of willing seller-willing buyer. The budget includes: (i) costs for compensation; (ii) income and livelihood restoration; (iii) external monitoring; and (iv) administrative costs. A 10% contingency margin was included. GDE will ensure timely fund disbursement and will prepare all the necessary detailed implementation plans.

A. Background

- The construction of Geo Dipa Energi (GDE)'s Dieng Unit 2 Geothermal Power Plant (the Project), financed by the Asian Development Bank (ADB) will include drilling activities of steam production wells, construction of steam pipelines, and construction of a power plant including transmission line. The Project started in 2019 with a planned target Commercial Operation Date (COD) in 2024 as stated in RP 2019. Based on the prepared planning documents, namely the Feasibility Study and Resettlement Plan, it has been identified that the Project requires approximately 309,000 m² (30.9 ha) land, of which 305,000 m² has been acquired by GDE.
- 2. Some of the existing (planned) well pads will require additional land, in particular for drilling activities in the area of well pad 7, well pad 9 and well pad 30. Referring to the results of a study by the PMU Drilling Team the total land requirement for well pad expansion areas is 12,459 m². The land is located in Karangtengah Village, Banjarnegara Regency. The total land requirement has changed due to BPKP's recommendation, and a remeasurement conducted by GDE and National Land Office (BPN) of Banjarnegara Regency in January 2022 and based on the Notary Letter Number 42/NOT-PPAT/I/2022 dated January 12, 2022. The notary had confirmed that the transfer of assets from the landowners at additional land of well pad 7 and well pad 9 to GDE for the area must be remeasured by BPN Banjarnegara Regency. This action has to be carried out, as a responsibility of the notary as the Land Deed Making Officer (LDMO), to check all land sale and purchase transaction documents, including the measurement results contained in the proof of land ownership and the actual conditions in the field, to ensure the security of the assets being traded¹.
- 3. The process of land certification in the context of land registration according to Article 77 paragraph (1) of the Regulation of the State Minister of Agrarian Affairs/Head of the National Land Agency Number 3 of 1997 concerning Provisions for the Implementation of Government Regulation Number 24 of 1997 concerning Land Registration, the measurement of land parcels is basically the responsibility of the Head of Land Agency. The buyer has a right, before a sale and purchase is carried out, to apply (through a Notary) for a re-measurement at the local land agency, so that the land area is known for certain and clearly. Based on the re-measurement, if there is an error, the Head of Land Agency will make corrections/changes to the physical data in the land book or in the certificate.
- 4. This change in land area required has an impact on the assets assessment result prepared by KJPP Andi Tiffani and Partner. For this reason, KJPP has revised the previous

¹ The responsibility of the Land Deeds Making officer is based on Government Regulation No. 37/1998 concerning Regulations for the Position of Land Deeds Officer (PPAT – *Pejabat Pembuat Akta Tanah*). In every property buying and selling process, the services of a notary or land deed officer (PPAT) are usually inseparable. Their assistance is required not only to facilitate the transaction process for certificates of land rights, but also to ensure their security because they have a permanent legal basis and are enforced. The process of re-measuring additional land in Pad 7 and Pad 9 is to guarantee the status of the assets being traded.

assessment, based on a work order Number 043/PRO.03/GDE/VIII/2022 dated 30 August 2022 and also on their revision of the report Number 00241/2.0157-00/PI/02/0446/1/IX/2022 dated September 13, 2022. This change in land area required has necessitated preparation of an addendum to the Dieng 2021 LARP document which was approved by ADB in December 2021.

B. Scope of the Addendum LARP Dieng 2021

- 5. The scope of Addendum LARP Dieng 2021 document consists of:
 - i) The amendment of additional land requirement for drilling activities;
 - ii) The scope of impacts;
 - iii) The loss of land;
 - iv) The loss of trees/crops;
 - v) Consultation and Participation of Affected People;
 - vi) The land acquisition budget and financing;
 - vii) The grievance redress mechanism; and
 - viii) Monitoring and reporting.

C. Amendment of Additional Land Requirements for Drilling Activities

- 6. Based on 2021 LARP Dieng there are 3 (three) of the well pad areas now require expanded areas for drilling activities (well pad 7, well pad 9, and well pad 30). Based on the initial identification and measurement of the affected land, carried out by GDE and supported by the District Land Office, the total area to be acquired for the well pad expansion is 12,459 m².
- 7. Prior to the payment GDE sought legal opinion on the initial measurement and valuation result from the Provincial Auditors (BPKP). One of the provincial auditor's recommendations was for GDE to use the area of land written in the land certificates as a basis for compensation, rather than the measurement from the land office, which was recommended in a letter issued by the Provincial Auditor Letter on13 December 2021. In response to the recommendation, GDE issued the letter No. 120/PRO-08-GDE/XII/2021 dated December 14, 2021, asked the appraisal team to conduct a re-evaluation of compensation, to refer to the areas listed in the AHs certificates, as was recommended by the auditor. The re-valuation was held on December 16, 2021.
- 8. The Notary requested verification of the affected area listed in the certificates in order to prepare a deed of sale and purchase land. The District Land Office re-measured the land and found a difference in additional land pads 7 and 9. GDE assigned an independent appraiser to update the valuation of additional land of pads 7 and 9 based on the new measurements of the affected area. The 3rd re-valuation of compensation for these areas

was prepared by the independent appraiser on September 13, 2022, referring to the latest affected land measurements, from December 2021.

9. The summary of the affected areas for the Dieng 2 project can be seen in the Table 1 below.

Land Requirement	Total Affected Area based on First Measurement by Land Office	Total Affected Area based on area listed in the Certificates	Total Affected Area based on second measurement by Land Office*	Location
	1 st valuation by 12 Nov 2021	2 nd valuation on 16 Dec 2021	3 rd valuation on 13 Sept 2022	
Well pad 7	5,663	5,610	5,709	
Well pad 9	2,915	2,890	2,942	Karangtengah Village
Well pad 30	3,881	3.881	3.881	v indge
Total	12,459	12.381	12.532	

Table 1. The Comparison of Total Additional Land Requirement for Dieng 2 Project

*as requested by the notary.

Source: Independent Appraiser Report, September 2022.

10. Based on the adjustment as mentioned above, and on the notary's letter regarding BPN re-measurement survey, Independent appraiser had prepared the third valuation report dated September 13, 2022. This report has been used as a basis for this 2022 Addendum to the 2021 Dieng LARP.

D. Scope of Impact, Land Acquisition Budget and Financing

11. Based on the re-measurement results, as conducted by GDE and BPN Banjarnegara Regency, the additional land for well pad expansion in total is 8,651 m². This land is for drilling activities: rig equipment layout with mini camps and water/mud pond. The total of 8,651 m² had been valuated by an independent appraiser. The summary of additional land required can be seen in Table 2.

Land Requirement	Total Affected Area based on First Measurement by Land Office	Total Affected Area based on area listed in the Certificates	Total Affected Area based on second measurement by Land Office*	Intended Land Use	IR Impact (Yes/No)
	1 st valuation by 12 Nov 2021	2 nd valuation on 16 Dec 2021	3 rd valuation on 13 Sept 2022		
Well pad 7	5,663	5,610	5,709	Rig equipment layout with mini camps and drilling well	Yes
Well pad 9	2,915	2,890	2,942	Water pond, well testing and	Yes

Table 2. Land Area and Uses for Additional Land Required for Dieng 2

Land Requirement	Total Affected Area based on First Measurement by Land Office	Total Affected Area based on area listed in the Certificates	Total Affected Area based on second measurement by Land Office*	Intended Land Use	IR Impact (Yes/No)
	1 st valuation by 12 Nov 2021	2 nd valuation on 16 Dec 2021	3 rd valuation on 13 Sept 2022		
				maintenance (permanently used during exploration and production)	
Well pad 30	3,881	3.881	3.881	Water/mud pond used during exploration only	Yes
Total	12,459	12.381	12.532

1. Loss of Land

12. Based on new measurements, the sub project will require a total of 8,651 m² which is private land located in Karangtengah Village. According to the Dieng 2021 LARP, total land will be compensated at full replacement cost.

2. Loss of Crops/Plants

- 13. Valuation of the loss of crops/plants were included in the first and second valuation by the independent appraiser. In the third valuation, the crops/plants did not calculate because had been paid in the first payment to landowners. There had been an agreement between GDE and the landowners that all land buying and selling activities **at the agreed price include the plant/crops**.
- 14. The summary of assets and people affected due to land acquisition can be seen in the Table 3 below.

Total land Requirements	First Valuation/ LARP Dieng 2021	Second Valuation	Third Valuation/ Amendment
Privately owned land			
Purchased	8,578 m ²	8,500 m ²	8,651 m ²
Leased	3.881 m ²	3.881 m ²	3.881 m ²
Sub Total	12.459 m ²		
Total amount of affected crops (only seasonal crops will be affected)	-	-	-
Predominantly potatoes with some temperate vegetables	-	-	-
Seasonal crops:			

Table 3. Summary of Impacts by Land Acquisition

Total land Requirements	First Valuation/ LARP Dieng 2021	Second Valuation	Third Valuation/ Amendment
Potatoes	22,000 Kg		
Chili	200 Kg	411 plants	-
Spring Onion	1,800 Kg		-
Cabbage	34,500 Kg		-
Carica		132 plants	-
Eggplant		8 plants	-
Total number of people affected			
Number of affected landowners	2 AHs/ 9 APs	2 AHs/ 9 APs	2 AHs/ 9 APs
Number of Original Landowners	3 AHs/ 11 APs	3 AHs/ 11 APs	3 AHs/ 11 APs

3. Consultation and Participation with Affected People

15. The series of consultation for the 2022 Addendum of the 2021 Dieng LARP preparation was carried out on November 16, 2021, at the GDE Temporary Office in Dieng, Central Java Province. The event was attended by 28 people from the Karangtengah village consisting of 5 women and 23 men, as documentation shows in Appendix 11 of the 2021 Dieng LARP. Additional socialization activities for the addendum process have not yet been carried out because a critical piece of information - the amount of top-up compensation – is not available as the it is not yet be determined. As such, a meeting with the landowners will be held after the top-up or supplementary compensation value is approved by ADB and GDE.

4. Land Acquisition Budget and Financing

16. The land acquisition budget and financing aspect that need to be updated are focused on the third re-valuation result prepared by the independent and based on values from the changes in area measured. The aspects that have been updated are: the estimation of land market price; total replacement value; and total land acquisition budget. These are elaborated below.

a. The Estimation of Land Market Price

- 17. Estimation to determine the value of affected land and assets was done by comparing market data in the form of offers or transactions that occurred on several similar assets and then analysing the relationship of the influencing factors to determine the value of the asset being assessed, namely land at well pads 7 and 9. If the assessed asset has a factor that is different, superior or inferior to the comparison data, then an adjustment Is made by increasing or reducing the value.
- 18. To determine land prices using comparative data around the assets, especially from similar agricultural land, the Project / appraiser obtained information from several locations around Wanayasa Dieng Road. The market prices in those areas are around IDR 1,050,000 IDR 5,600,000. After obtaining the comparative data indication of land value, then was adjusted by considering certain factors, to determine a reasonable property comparison value.
- 19. Based on the comparison of the data above, the indications of land market value can be seen in Table 4 below. The calculation result shows that the third re-valuation of land market value higher than first valuation and second valuation. Thus, GDE will pay higher land acquisition costs than those stated in the 2021 Dieng LARP document.

No. V		Name of Eligible People	The First Valuation (Nov 12, 2021)/LARP Dieng 2021		The Second Valuation (Dec 16, 2021			The Third Valuation/Amendment (September 13, 2022)			
	Well Pad area		The Total Area (m²	Unit Rate (IDR)/m ²	Indication of Market Land Value (IDR)	The Total Area (m²	Unit Rate (IDR)/m ²	Indication of Market Land Value (IDR)	The Total Area (m²)	Unit Rate (IDR)/m²	Indication of Market Land Value (IDR)
1	Well pad 7	Hj. Hardati (wife of Hadi Mansur)	5,663	3,097,370	17,540,406,310.	5,610	3,097,370	17,376,245,700	5,709	3,100,000	17,697,900,000
2	Well pad 9	Mulyono Bolot/Ahmad Said	2,915	2,477,896	7,223,066,840.	2,890	2,447,896	7,161,119,440	2,942	2,600,000	7,649,200,000
	Tota	l	8,578		24,763,473,150	8,500		24,537,365,140	8,651		25,347,100,000

Source: Independent Appraiser Report, November 2021, December 2021, and September 2022

b. Adjustment Factor

- 20. The factors that are considered in making adjustments to land values for compensation/payment are different for each type of asset. In justifying the comparison of property data, the following are key considerations:
 - Location factors, including consideration of accessibility, infrastructure and facilities, development prospects, occupancy rates and overall environmental conditions.
 - Broad or general contextual factors, with respect to the liquidity (level of convenience) of sales.
 - Form factor, including floor plan, frontage and ground position.
 - Physical condition factors, including the overall physical condition of the soil.
 - Ownership status factor with comparison between Property Rights, Building Use Rights, or Others.
 - Time factor, namely the possible price difference between the time of bidding/transaction and the price indication at the time of assessment.
 - Other factors that can affect the value, such as the existence of compulsion for a transaction, for example.

c. Estimated Replacement Cost of Plants/Crops

21. The land acquisition impact is permanent, so the value of plants/crops/trees was calculated in the first valuation and second valuation by independent appraiser. In the third valuation, the crops/trees were not valuated due to the actual condition was empty and no agricultural activities on the site. This policy stated in the Indonesia Valuation Standard. Besides that, there had been an agreement between GDE and the landowners that all land buying and selling activities **at the agreed price (lumpsum) include the plant/crops**.

d. Non-physical Costs

22. Based on the estimated of the market land value and rental land value as described above, the non-physical costs were calculated by independent appraiser such as the Land Deed Official (PPAT – *Pejabat Pembuat Akta Tanah*) cost and Land and Building Rights Acquisition Cost (BPHTB - *Bea Perolehan Hak atas Tanah dan Bangunan*). The non-physical value of the 3rd valuation was lower than in the first and second valuation reports because the non-physical losses of the last valuation were calculated as 0.25% of the total compensation amount, while in the other two assessment it was calculated as 1% of the total compensation amount (refer to MASP Regulation No.33/2021).

e. Other costs

23. Waiting Period Cost. ²The other costs that were calculated by independent appraiser in the first and second valuation was waiting period cost. The waiting period compensation is the amount of funds calculated as a substitute for the time difference between the assessment date and the estimated date of compensation payment. The waiting period can be calculated as the deposit interest rate at the state bank for a waiting period of less than 6 months (SPI 204). This cost was not calculated by the independent appraiser in the third valuation due to a letter from PT. Geo Dipa Energi Number 059.1/PRO.08-GDE/IX/2022 dated September 2, 2022, regarding the Letter of Statement, wherein it was stated that GDE would immediately pay the compensation to the landowners, thus no waiting period cost was not given to landowners and no necessary to be calculated or recorded.

f. Conclusion on Full Replacement Cost of Land

- 24. This land acquisition assessment for the Dieng 2 sub-project applied SPS ADB 2009 and the Indonesia Valuation Standards 204 (SPI 204). The compensation and assistance under the sub-project should be paid in accordance with SPS requirement for full replacement cost or equivalent, to the same principle. The calculation of full replacement cost will be based on the following elements: (i) fair market value; (ii) transaction costs; (iii) interest accrued; (iv) transitional and restoration costs; and (v) other applicable payments, if any. Based on these elements, basically both ADB SPS 2009 and Indonesia SPI 204 have similar values regarding the replacement cost. As mentioned in the 2021 Dieng LARP, both indicate that all compensation should be based on the principle of replacement cost, which is the method of valuing assets to replace the loss at current market value (physical), as well as any transaction costs such as administrative charges, taxes, registration and titling costs (non-physical). The replacement cost value should be enough to replace affected assets and/or cover transaction costs necessary to replace the affected assets without depreciation for such assets, as well as covering material advantage, taxes and/or travel expenses³.
- 25. In this 2021 Dieng LARAP 2022 Addendum, the full replacement cost has been used as the basis for the valuation of assets and implemented as fair replacement cost as mentioned in Indonesia Valuation Standard (SPI) 204. As mentioned above, both of the standards use market price as the basis in the valuation of assets. The Fair Replacement Value as a value based on the interests of the owner (the value to the owner); (ii) Market value equivalence; (iii) non-physical losses caused by the compulsory right relinquishment

² According to SPI 204², the waiting period compensation is the amount of funds calculated as a substitute for the time difference between the valuation date and the estimated date of compensation payment. The waiting period can be calculated as the term deposit interest rate at the state bank, for awaiting period of less than 6 months.

³ SPS ADB 2009

of property owner⁴; (iv) property ownership is not limited to ownership rights, but can be interpreted as control, management and use of property in accordance with applicable laws and regulations or according to the agreed scope of assignment; (v) valuation date is the announcement date, and the date of site determination for development for public interest in accordance with the applicable legislations; (vi) value adding should be calculated based on the risks incurred from owner's potential losses. The adequate replacement value must be higher than Property Market Value or at least equal to the compensation transaction value of similar property (if the comparator is a similar property from a compensation transaction).

- 26. The comparison of total full replacement cost for each valuation for Dieng sub-project can be seen in Table 5 and the explanation as follows:
 - The total market land value recorded in first valuation/the LARP Dieng 2021 document was IDR. 24,763,473,150. This is less than the total market land value in the third valuation/September 2022, which was for a total value of IDR. 25,347,100,000. This is due to the change in total land requirement and land price/m² that was calculated in the third valuation being larger than the first valuation, which was previously stated in the 2021 Dieng LARP document.
 - 2) The plants/crops value were calculated in the first and second valuations for the third valuation was not calculated because there had been an agreement between GDE and the landowners that all land buying and selling activities **at the agreed price (lumpsum) include the plant/crops**.
 - 3) The Non-physical value of the third valuation is lower than first and second valuations because the non-physical losses of the last valuation were calculated as 0.25% of the total compensation while at the time of the other two assessments, it was calculated as 1% of the total compensation (refer to MASP Regulation No.33/2021). This is due to, and following, a change in the MASP regulations.
 - 4) The waiting period cost based on a letter from PT. Geo DIPA Energi Number 059.1/PRO.08-GDE/IX/2022 dated September 2, 2022, regarding the Letter of Statement, explains that the company would immediately pay the compensation to the landowners. Therefore, the independent appraiser had assumed that the waiting period cost was not given. As such, the total replacement cost in the third valuation did not include the waiting period cost.
- 27. Based on the summary above, it is concluded that the total full replacement cost in the third valuation was higher than the first valuation and second valuation. The third valuation is the amendment valuation result which will be used as the basis for GDE to top up the land acquisition payments to landowners for the expanded land areas under this LARP Addendum. Thus, GDE will deliver the difference between the 3rd valuation and the previous delivered payment, so the total top up compensation for additional land in well pad 7 is **IDR 926,139,750** and well pad 9 is **IDR 398,583,000** as described in Table 5 below.

Table 5. The Comparison of Total Replacement Value for Each Valuation

g. The Estimated Total Land Acquisition Budget

- 28. The land replacement cost will be financed by GDE. Furthermore, GDE will ensure that adequate funds are made available as and when necessary for the efficient and timely implementation of the LARP and its addendum. The cost includes: (i) detailed replacement cost of affected assets including non-physical costs valuated by the independent appraisal; (ii) budget for implementation of a three-year livelihood restoration program (2023-2025); (iii) operational costs, which consist of administrative costs for land acquisition and assessment team to handle objections/grievances, land appraisal, and measurement; and (iv) costs for external monitoring for land acquisition activities ; and (v) a contingency of 10% of the total amount.
- 29. A summary of the estimated land acquisition and resettlement costs for the replacement of both physical and non-physical assets, the cost of livelihood restoration programs and external monitoring costs are **IDR 30,826,838,499.63 or US\$ 1,976,712.95** (1US Dollar = 15.595/19 December 2022). Livelihood restoration program cost as estimated in Table 6 below is being implemented as part of the original LARP 2021 and the activities are explained separately subsequent to the overall cost estimate.

No.	Cost type	Estimated Replacement Cost (Rp)
Α.	Full Replacement Cost	
1.	Physical and Non-Physical Cost	26,671,822,750
2.	Land Rental Cost	431,110,860
	Sub-total (A)	27,102,933,610
В.	Activity Cost	
1.	Estimation Cost for Livelihood Restoration Program Activity (1% of A)	271,029,336.1
2.	Estimation Cost for External Monitoring Activity	100,000,000
3.	Grievance/Complaint Resolution	50,000,000
	Sub-total (B)	421,029,336.1
	Sub-total (C) = (A+B)	27,523,962,946.1
	Contingencies 10% of C	2,752,396,294.61
	Administration Cost 2% of C	550,479,258.92
	Grand Total IDR	30,826,838,499.63
	Grand Total US\$	1,976,712.95

Table 6. Overall Cost Estimate

Source: KJPP Analysis Results and LARP Team, October 2022

30. The target people in the livelihood restoration program and the types of activities, as set out with more detail in the 2021 Dieng LARP, can be seen in the following Table 7.

TYPE OF ACTIVITY	TARGET PERSON / GROUP	Severely AHs and Vulnerable AHs
1. Scholarships and board and lodging allowance	Students from AHs	5 APs (2 man, 3 women): land workers
2.Value chain analysis, development for <i>carica</i> processing and marketing (including permits/certification).	Women	6 APs (women): land workers
 Value chain analysis and development for processing and marketing of potato crisps and crisps from tubers (cassava, yam, sweet potato) including permits (certification) 		 1 HH's (5 APs): the landowner (2 women, 4 man) 4 land workers (6 APs) (2 women, 4 man) Place: Karang Tengah

Table 7. Livelihood Restoration Program Target Groups

5. Grievance Redress Mechanism (GRM)

31. The GRM for the 2021 Dieng LARP also applies to the addendum, for the expanded well pad areas. The GRM is set out clearly and has been socialised with the AH, including during the consultation activities for the land appraisal process. If there are the problems regarding the payment of top-up compensation and other problems related to land acquisition in the Dieng area, the complaint submission channel can be submitted/sent through the PMU Social Safeguard in Dieng Office. There is also a Grievance Redress Committee (GRC) already in place, for more advanced or complex cases of grievance. This is consistent with international best practices. The main difference with the GRM for the expanded (addendum) activities is the need for some additional, special effort to inform the AHs about the mechanism, and the special appointment of persons to specifically handle LARP related complaints, and to ensure reporting is compiled explicitly for LARP related grievances.

6. Institutional Arrangements

32. The PMU has a unit at field sites in the Dieng area. A Social Safeguards and Public Relation (PR) Supervisor has been designated at the Dieng Unit, responsible for: (i) supporting the government relation and social safeguards assistant manager for the day-to-day implementation and monitoring of safeguards plans, including implementation of the LRP; (ii) supporting the Land Acquisition Team (LAT) in implementation of the whole land acquisition and land clearing process, which includes facilitating consultations and

disclosing information to affected communities and APs; and (iii) supporting the functioning of the GRM / complaints handling process. The Social Safeguard and PR Supervisor is a member of the Grievance Redress Committee coordinated by the GA and Finance Staff.

- 33. A land acquisition team (LAT) has been established by the PMU/GDE Headquarters office for conducting the land acquisition process (since October 2021). The LAT comprises members from relevant divisions at GDE head-quarter level (GA), and Unit-level (HC/GA and PR), and representatives from the Banjarnegara Regency Land Office (KTR-BPN), the Head of Batur District's office and Head of Karangtengah Village. The Government Relation and Social Safeguards Assistant Manager at the main office, and Social Safeguard and PR supervisor at the Dieng Unit level, will support this team and ensure that other related IR requirements are fulfilled.
- 34. The LAT will also continue to collaborate with Banjarnegara District Land Office (KATR/ BPN) to support the land acquisition process and update land ownership status records and ensure archives of relevant documents are maintained.

7. Timeline of the2021 Dieng LARP 2022 Addendum Implementation

35. The timeline for the implementation of the 2022 Addendum of the 2021 Dieng LARP is set out in in Table 8. Scheduling these activities in more detail can be completed once consultations with the AH is planned.

No.	Description	Timeline
1	Valuation of Appraisal Report	August – September 2022
2	Preparation of draft Addendum LARP Dieng	September – December 2022
3	PMU and ADB review	September – December 2022
4	ADB Approval	January 2023
5	Delivering Top Up of Compensation	January 2023

Table 8. The Addendum of LARP Dieng 2021 Implementation Schedule

8. Monitoring and Reporting

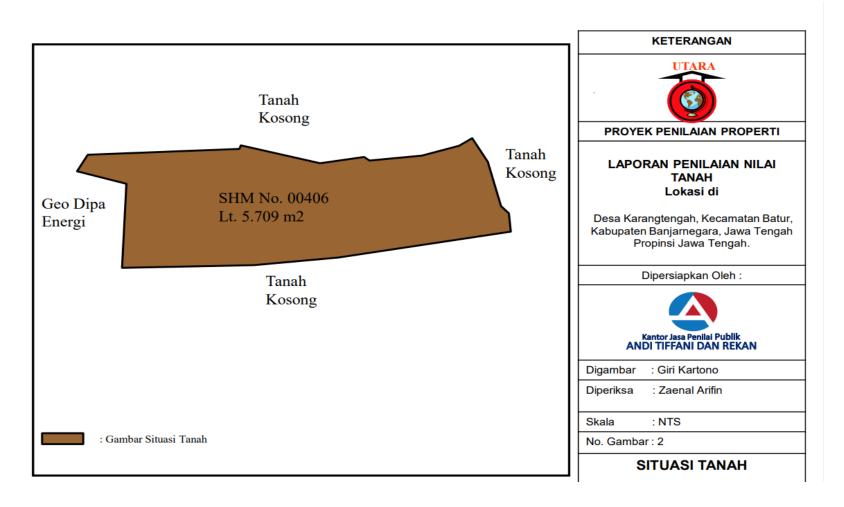

36. To monitor the 2022 Addendum of the 2021 Dieng LARP the PMU assisted by PMC will conduct thorough internal monitoring. The implementation of top up compensation payment will be reported in the semi-annual monitoring report January – June 2023.

Appendix 3. Summary Report the First Valuation by KJPP Tiffany And Partner (November 12, 2021)

Nilai Pasar (*Market Value*), yang didefinisikan sebagai estimasi sejumlah uang yang dapat di peroleh atau dibayar untuk penukaran suatu aset atau liabilitas pada tanggal penilaian, antara pembeli yang berminat membeli dengan penjual yang berminat menjual, dalam suatu transaksi bebas ikatan, yang pemasarannya dilakukan secara layak, di mana kedua pihak masing-masing bertindak atas dasar pemahaman yang dimilikinya, kehati-hatian dan tanpa paksaan (SPI 101-3.1).

Nilai Ganti Kerugian, adalah penggantian yang layak dan adil kepada Pihak yang Berhak, pengelola dan/atau pengguna barang dalam proses Pengadaan Tanah. Komponen Ganti Kerugian terdiri dari Nilai Ganti Kerugian Fisik atau Nilai Pasar dari tanah, ruang atas tanah dan bawah tanah, bangunan, tanaman, benda yang berkaitan dengan tanah, dan/atau kerugian lain yang dapat dinilai (Ganti Kerugian Non Fisik) yang diantaranya meliputi kerugian akibat kehilangan usaha yang sedang berjalan, pajak dan bea perolehan tanah serta biaya relokasi. Istilah Nilai Ganti Kerugian terdapat pada Peraturan Presiden No. 71 tahun 2012 yang telah diganti dengan Peraturan Pemerintah No. 19 tahun 2021 Pasal 1 ayat (12).

Nilai Penggantian Wajar (*Fair Replacement Value*), adalah nilai untuk kepentingan pemilik yang didasarkan kepada kesetaraan dengan Nilai Pasar atas suatu properti, dengan memperhatikan unsur luar biasa berupa kerugian non fisik yang diakibatkan adanya pengambilalihan hak atas properti dimaksud. Nilai Penggantian Wajar diartikan sama dengan Nilai Ganti Kerugian sebagaimana dimaksud dalam UU No. 2 tahun 2012 dan UU No. 11 Cipta Kerja Tahun 2020 (SPI 204-3.10).

Nilai Sewa Pasar (*Market Rental Value*) adalah perkiraan jumlah uang yang dapat diperoleh dari penyewaan suatu aset pada tanggal penilaian, antara pemilik yang berminat menyewakan dan penyewa yang berminat menyewa sesuai persyaratan sewa yang layak dalam transaksi bebas ikatan, yang pemasarannya dilakukan secara layak, dan tiap-tiap pihak mengetahui, bertindak hati-hati, dan tanpa paksaan (SPI 101-3.6).

Kami menegaskan bahwa dalam Laporan Penilaian ini diterbitkan menggunakan Bahasa Indonesia dan mata uang yang digunakan adalah rupiah. Surat pengantar ini merupakan satu kesatuan dan tidak dapat dipisahkan. Sesuai kesepakatan dengan pemberi tugas, Laporan Penilaian ini berbentuk Laporan Penilaian Terinci.

Laporan Penilaian Terinci (Self Contained atau Comprehensive Style), secara umum mendeskripsikan informasi secara detil dan komprehensif. Laporan ini seharusnya mengandung seluruh informasi yang signifikan dalam penilaian, termasuk pembahasan secara mendetil atas setiap hal yang dinyatakan dalam laporan. Laporan ini membutuhkan tingkat kedalaman investigasi sesuai yang dimaksud dalam Lingkup Penugasan. (SPI 105-3.2.b.1)

Dengan mempertimbangkan seluruh informasi yang relevan dan kondisi pasar yang berlaku, kami berpendapat bahwa *Nilai Penggantian Wajar* dari total Luas 8.578 m² dengan jumlah 2 (Dua) Bidang properti tersebut pada tanggal **12 November 2021** bergantung pada komentar yang ada di laporan ini, adalah:

> Nilai Penggantian Wajar

Rp. 26.906.399.986,-(Dua Puluh Enam Milyar Sembilan Ratus Enam Juta Tiga Ratus Sembilan Puluh Sembilan Ribu Sembilan Ratus Delapan Puluh Enam Rupiah)

dan Nilai Sewa total luas 3.881 m² dengan jumlah 1 (Satu) bidang pada tanggal 12 November 2021 bergantung pada komentar yang ada di laporan ini, adalah:

Nilai Sewa

Rp. 143.703.620,-(Seratus Empat Puluh Tiga Juta Tujuh Ratus Tiga Ribu Enam Ratus Dua Puluh Rupiah)

Akhirnya, sesuai dengan praktek standar yang biasa kami lakukan, maka kami menegaskan bahwa laporan ini bersifat rahasia kepada **Pemberi Tugas**, dengan keperluan tertulis. Kami tidak bertanggung jawab kepada pihak ketiga, baik sebagian maupun keseluruhan laporan ini tidak dibenarkan untuk diterbitkan dalam dokumen apapun, pernyataan, edaran, atau untuk dikomunikasikan kepada pihak lain tanpa persetujuan tertulis terlebih dahulu dari kami untuk dimunculkan.
